# Experts

 *in Games & Exercise*

Dear Customers,  
Dear Erzi Friends,

*„Do you want to play with me?“ – „Who do you want to be?“*

Children live and love role play – playfully practising understanding and empathy, assertiveness and consideration, responsibility, self-confidence and so much more on the way to developing their own personality.

We want to encourage and challenge children, motivate them to learn and move through play, accompany them without defining their roles, stimulate their imagination and creativity, recognise their strengths and needs, consolidate competence and self-confidence –

**in short:** make them fit for the challenges of their lives and this time, step by step, stage by stage. Erzi products want to be companions and instruments for this journey, from building materials for limitless imaginative play to detailed role-play accessories. All our play and sports products make you want to play and move and are developed and manufactured in Germany in a responsible and sustainable way, lovingly designed and tested by experts.

Test with us – welcome to the Erzi world!

We wish you a lot of fun and success with our Erzi products!

# NO PANIC, IT'S ORGANIC!

*The very place for shopping ...*

*Shopping can be such a fun!*

**Erzi grocery stores** have always been an all-round favourite in nurseries and group play areas. Shops and supermarkets form an essential part of role-playing games as they provide ample space for interaction and communication besides firing the imagination.

By nature, youngsters simply love doing the same things as grown-ups. Unconsciously, they learn to engage with other children and to rely on themselves whilst training their speech abilities, learning to count and to do simple arithmetic.

# SWEET AS SUGAR *and highly coveted*

**NEW**

Fancy something sweet? Then come and visit our patisserie of wooden art on the peaks of the Erzgebirge mountains in Germany. Just behind the seven summits, at the seven peaks, there is a little crispy house with a big oven. Here, people lovingly tinker, chop, cook and bake. You can taste the love and smell the fragrance of the effort that went into our little darlings. The ingredients, of course, remain top secret.

 enact the buying and selling of groceries.

Twelve different kinds of food made of wood to play

 and removed again. Children re-enact daily situations  
 and thus learn to deal with different shapes and

This role-play is suitable for all ages. The ghosts appear in different, luminous colours with funny faces. When the ghosts are stacked, the game becomes suspenseful: Which ghost will make the stack fall?! If the Erzi Ghost Board is mounted vertically, the 30 ghosts in total can be stacked the highest.  
For concentration and strategy, children can achieve great success with this variant. If the stack falls, however, a stacking ghost remains standing only rarely. Due to different stacking heights, small and older children can play with the ghost board at the same time. The slim form makes it possible to integrate the ghost board into small playing areas as well. In the crosswise format, the ghost board is particularly suited for small children. Up to 5 children next to each other can play with the ghosts or build small ghost stacks. Here, the storage slots can also be used as grab handles. Arranging the ghosts in the storage slots is a good way to make cleaning up fun.

 material: beech, coloured laquered; birch plywood  
 "The goal is the journey itself". This is a playful method for children to learn by dint of hard work how rewarding the whole game can really be when the goal is finally reached. Running water or rolling marbles proceed on a downward course. No matter whether used in summer or in winter, indoors or out in the sandpit, children will derive fun and pleasure from this product everywhere and at any time of the year. A closer look at the way the Marble Course works suffices to disclose its true potential. A small dam brings the marble to a halt, causing the water to overflow. Small holes at the sides are ideally suitable for inserting small sticks or flowers which serve to decorate the route while enhancing creativity. A hole can make the marble or the water disappear and set it in motion again at another level. A supplied plug (cork) serves to complement this feature. Warning! Not suitable for children under 36 months. Choking and suffocation hazard! Contains small parts and balls.

content: 10 pegboards, 55 peg cubes, instructions  
material: birch plywood, nature; beech, nature and coloured printed

Our counting towers enable children of pre-school and primary school age to explore numbers through play. They help to develop an imagination for quantities. Likewise, they playfully – and simply – illustrate number decomposition, simple addition and subtraction, and the concepts of „greater than“ and „less than“.

On the pegboards, numbers 1 to 10 can be explained with the cubes using four different coloured symbols (star – yellow, triangle – blue, square – green, circle – pink), Enabling the child’s eye to quickly grasp and deal with small quantities. The clear symbolism also lets colour-blind children grasp the theme without barriers.

content: 21 different wooden pieces, 2 wooden bowls, sorting templates to be cut out of fleece (40x40cm)

material: beech, nature and coloured laquered; polyester fleece printed

Differences are easiest to convey through examples. Our educational game provides a variety of different shapes, sizes and colours – turning sorting and comparing into child’s play! Various contrasts are visually depicted on the printed fleece templates. The individual contrast tasks (small – large, round – square) can be cut out, and then the small parts are sorted according to the instructions with the help of the two wooden bowls.

The game can be expanded easily by simply incorporating objects from the direct play environment when sorting. So, can you find more round, square, colourful ... things? This game promotes motor skills, thinking structures, language, communication, a feel for haptics, an understanding of colours, etc.

# HANDS-ON ...

*... arithmetic & geometry!*

*Now simplified at long last!*

To many people, mathematics is a fully abstract term, often quite hard to grasp without means of illustration. The educational game Fractions of a Whole not only conveys a visual impression of fractions, but also allows kiddies to gain hands-on experience!

1

COMPARE  
VOLUMES FOR  
EASY UNDER-  
STANDING

## INFO

The system comprises three principal components:

- Each part (whole, half, etc.) is designed as one self-contained solid unit instead of being made up of two pieces stuck together. This enables the formation to be visualized as a whole.
- All components are of the same colour (i.e. wood left in its natural state) so that they are easily recognizable as forming one single whole.
- Each piece is accorded its own space on the mat. If a cube needs to be formed from four quarters, the child removes each quarter from its mat and places it in the appropriate spot.

### Educational Game Fractions of a Whole

length:..... 50,5 cm      width:..... 7,5 cm  
height:..... 14,5 cm      Ø:..... -  
weight:..... 736 g

content: 1 large cube – to form a whole, 2 halves, 4 quarters and 8 eighths; 1 play mat (40x40cm)

material: beech, nature; polyester fleece, printed  
Constructed from solid beech, this unique system is designed to teach children the various parts making up a whole number. While playing with the three-dimensional pieces i.e. cubes, kiddies learn to distinguish whole shapes and their individual constituents such as halves, quarters, eighths, etc. When advancing to higher primary school grades, they then learn how to express these shapes abstractly in the form of fractions.

This direct learning-by-playing method teaches youngsters the number of different possibilities of forming a cube, say from two halves, one half and four eighths, two quarters and one half, etc.

This educational game is highly recommendable for children with special needs.

content: 6 geometric shapes (cube, quad, sphere, pyramid, cone and cylinder), 2 play mats (40x40cm)  
 material: beech, nature; polyester fleece, printed  
 This didactic set helps children to understand basic geometrical principles. By seeing, holding and playing children learn the meaning of bodies, surfaces, shapes, symmetry and relations. It's made of solid beechwood.

Solids are 10 or 6 cm high and 6 cm wide/in diameter.

The children learn the basic geometric principles through play. They learn the meaning of shapes, size, bodies and surfaces, symmetry and harmony. Children attribute relevant properties to geometric bodies by touching them. Didactic value is upgraded with matching geometric faces on the play mats for better understanding of surfaces, edges and corners.

The boxes can be stacked to fit exactly and have handle openings on the sides for easy transport, safe handling and simple loading, unloading and moving. Whether individually or stacked – our Courage balancing staircase is stable and tip-proof. The height settings can be combined many times over and can be stored in a space-saving manner thanks to their stackability.

Resorting to a variety of different materials, surfaces and motor challenges serves to train bodily perceptions. An adult-sized foot (size 43/9) is taken as a basis, this making the SensoPath product suitable for all age groups. All materials used are sweat- and saliva-proof, and are tested for toxics or harmful substances. SensoPath units are ideal foot trainers for games, sports and therapeutic applications.

Here the idea is to jump from one puddle to the next even if having forgotten to put on one's wellingtons. Those walking the board in the normal way will soon find themselves stepping over an irregular arrangement of firm and somewhat shakier ground, an activity designed to improve sense of balance while strengthening the ankles.

length: ..... 42 cm      width: ..... 28,5 cm

 weight: ..... 1,8 kg  
 material: birch plywood, laquered  
 The Rocky Rocker is a game and sport product which can be used for young and old, as single product or as connecting point between two Erzi balancing boards. It corresponds to all current security standards and guidelines and offers nevertheless a design without any screws or nails. The Rocky Rocker is a natural product with love to the details and varied challenges to the exercise capacities of the children. The product can be used as stool and sitting or standing balancing seesaw. The seesaw demands from the user teamwork, balance, consideration, patience and coordination.  
 Rocky Rocker is a playing and sports device that can be used as a stool, a seat and a rock in either kneeling or standing position. In the sitting and kneeling position, the user may hold onto the rods. When placing an Erzi balancing board in the middle of Rocky rocker, it becomes a rocker for two children with numerous game variations (such as marble track). The rocker is great for walking (not running) over it. Placing a balancing board with one end on the Rocky Rocker and hooking this in forms a fixed ramp catering for a variety of different applications. In most cases, however, Rocky Rocker can be used as a connection of two Erzi balancing boards. The interaction of the connected boards requires and encourages coordination and concentration skills. In this variant, both Erzi balancing boards should be suspended by the appropriate rods.

Wave Slide and Roller Slides

If there ever were elements of sports equipment that stimulate their use, than it have to be the Erzi slides. Children find it hard to resist those slides! The roller slides are firmly embedded on turning foam rolls and can be used while lying on the stomach or on the back, forwards or backwards, kneeling or seated. Suspended on a trapezoid vaulting horse or wall bars (please note the drop height/protection), those equipments know no limits to the range of movements possible when using it for play or therapy.
